

Life Improving Prescriptions.

You should have options when treating your patients! At Zoe Scripts we give you those options. We meet the compounding needs of obstetricians, gynecologists, and your patients. Our pharmacists have the ability to custom compound medications that improve therapeutic outcomes, reduce side effects, and save patients time and money.

Using a hypoallergenic, elegant cream base for external or internal mucous membrane delivery of active ingredients, our **OB/GYN specific creams** are effective at meeting the needs of your patient population. **We have the ability to compound medications for the common conditions you treat.**

We also specialize in **Topical Pain Creams** whose synergistic ingredients attack pain on multiple levels. Our transdermal pain creams deliver relief directly to the site of pain, while minimizing systemic side effects. Useful for:

- Menstrual Cramps
- Pain associated with C-section, vaginal delivery, or hysterectomy.
- * Migraines
- * Painful ovulation of mittelschmerz

We also specialize in **Scar Cream Therapy** that provides a cosmetic effect and decreases likelihood of scar formation which is useful for:

- Post Surgery scars (ie- c-section)
- Stretch Marks

How we can help you meet the needs of your patients?
